

MyCard[©] Sign Up Worksheet

MyCard is the credit card processing arm of MyPms[©]. If you have elected to use this service, you have chosen to use the least expensive, fastest and most accurate form of processing credit cards available today. We will need a minimal amount of information to get you started. Unlike MyPms though, it may take a few days to get this service operating because we must work in conjunction with your merchant bank.

If you do not have this information, your bank's merchant card division should be able to supply you with this information. Inform them that we will set you up via a Vital/VisaNet processor. If you have never processed credit cards before, your bank should be able to set you up an account or refer you to another bank that can.

A. Credit Cards Accepted:

1. _____
2. _____
